

Claremont Canyon

The following maps present a suitability analysis of building sites in **Claremont Canyon** located in Oakland, California.

The first map displays opportunity factors — factors that would make a particular site in the Canyon ideal to build in. Considerations taken into account while building the opportunity factors map include accessibility and opportunity for year-round use.

The second map displays constraint factors — factors that would make a particular site in the Canyon impossible to build in. Considerations taken into account while building the constraint factors map include vulnerability to natural disasters and ground stability.
